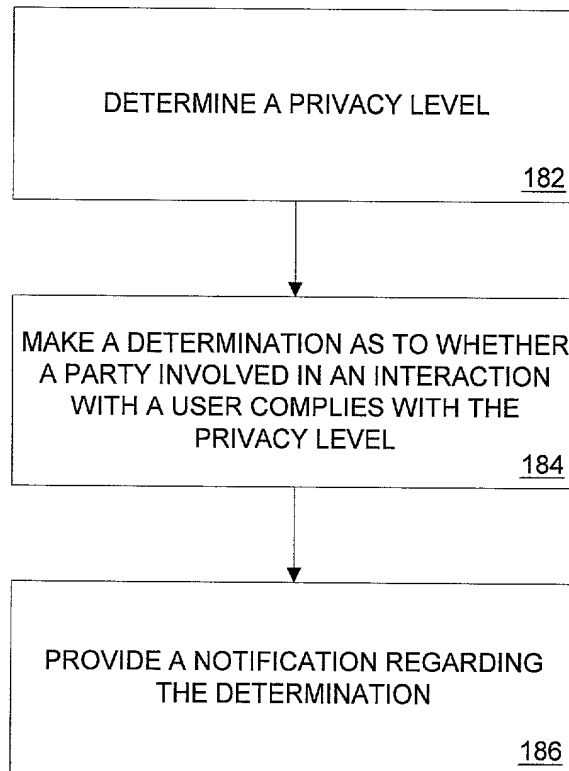

FIG. 5

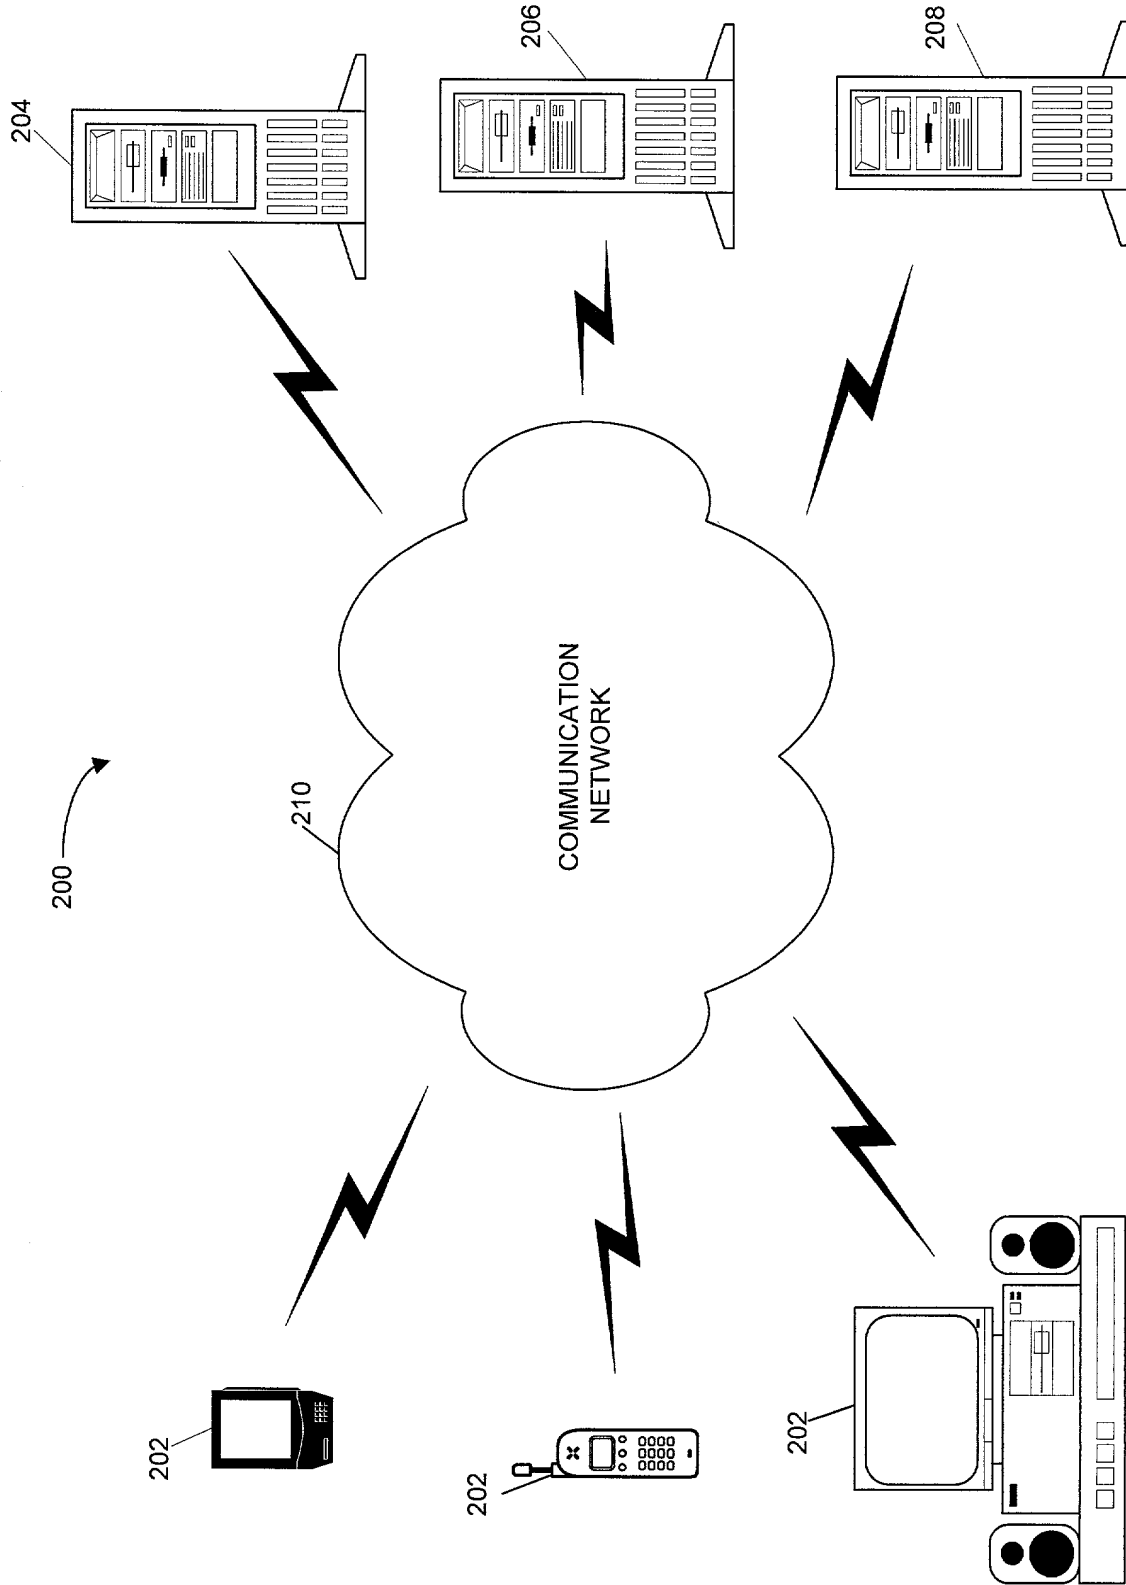

FIG. 6

FIG. 7 is a block diagram of a system 204, according to one embodiment of the present invention. The system 204 includes a processor 250, a communication port 252, an input device 258, an output device 256, a clock 254, a random access memory (RAM) 264, a read only memory (ROM) 262, and a storage device 260. The processor 250, communication port 252, input device 258, output device 256, clock 254, RAM 264, ROM 262, and storage device 260 are all connected to a system bus 276. The storage device 260 includes a control program 266, user information 268, user device information 270, service provider information 272, and interaction information 274.
